PROFESSIONAL SUMMARY

Computer Engineer with 3+ years' experience in web development, user interface design, engineering, integration, support, troubleshooting and maintenance of computer systems. High-end expertise in design of aesthetically appealing web sites for personal and large scale commercial use. Proper exposure to software and hardware troubleshooting, configuring web servers, designing, and executing web projects under W3C, WHATWG and ECMA Standards.

Detailed understanding of different code libraries and frameworks like react.js, paper.js, bootstrap, bulma, and skilled in version control management using git and github. Excellent analytical, organizational, problem-solving & resolution skills. Versatile and able to adapt to any work function.

CORE COMPETENCIES

Management

- Proven people and time management abilities, with strong organizational skills.
- Structured Project Management skills with good experience in delivering IT related projects and applying high quality and safety standards.
- Managing and executing high priority projects.

Technical

- Expertise in design, implementation and maintenance of web applications and graphical user interfaces.
- Expertise in debugging and troubleshooting code using multiple techniques such as browser developer tools, console, IDE debuggers, critical thinking, etc.
- Excellent fault detection and correction abilities.
- Working knowledge of API fetching and consumption, RESTful routing, web security configurations including cross site scripting, sanitizing HTML, database injections, etc.
- Configuring and maintaining web servers.

Communication

- Ability to adapt to new, changing, and fast paced work environment with excellent team building and collaboration skills.
- Cohesive interaction with clients at different project stages.
- Good multi-tasking ability with excellent written and oral communication skills.

PROFESSIONAL EXPERIENCE

Freelance | Enugu, Nigeria   **Oct 2021 – Current**
Web Developer
- Develop web applications using MEN stack and other development libraries like bootstrap, paper.js, Material UI, etc.
- Leverage REST services and other third-party APIs to shorten development times and expand product capabilities.
- Collaborate with colleagues to troubleshoot and debug code.
- Assess operational needs and requirements for producing high quality and cost effective jobs.
- Design images & graphics, and create redirect links for use in marketing and email campaigns.
- Maintain strong focus on security and efficiency to provide comprehensive maintenance to high priority projects.

Verbum CIDJAP Networks| Uwani, Enugu   **Mar 2021 – Jun 2021**
Web Development Tutor
- Taught new timers full stack web development using a standardized curriculum, encompassing both the frontend technologies and backend technologies.
- Guided my students one on one, to create basic responsive web pages and troubleshoot code.
- Developed my students by giving them problems that requires critical and analytical thinking, so as to learn to think in a programmer sense.
- Made use of different methods like code-alongs, practice tests, code exercises and homework to train students to achieve high understanding and learning of general web development concepts.
- Had students create their own full stack projects and then taught them how to deploy online.
- Performed other duties that commensurate with the capabilities of the active web developer.

Verbum CIDJAP Networks| Uwani, Enugu   **Apr 2020 – Oct 2020**
Junior Web Designer
- Created client-side websites with HTML, CSS, and vanilla JavaScript.
- Designed logos with Adobe Photoshop and Canva for websites to improve branding.
- Ensured that code was as DRY as possible, so as to improve efficiency in loading and using websites.
- Optimized websites to seamlessly respond from one device to another (small mobile phones, tablets, desktops, etc.), using media queries and the browser developer tools which improved user experience.
- Designed graphical mock-ups using Adobe Photoshop to layout and design web pages efficiently to achieve a well structured website.

Verbum CIDJAP Networks| Uwani, Enugu   **Mar 2019 – Nov 2019**
Network Engineer Intern (Industrial Training)
- Assisted in installing VSAT dishes and setup LAN network for clients.
- Configured network equipment for installations and performed post-installation testing.
- Assisted Lead Network Engineers to provide smooth communications by configuring LAN technology, wireless access points and controllers.
- Provided hands-on troubleshooting, routing and switching to resolve issues with maximum efficiency.
- Performed tests on newly installed hardware and software to provide components that interface correctly with each other and network.
- Performed computer hardware and software fixes for both internal staff and external clients.

EDUCATION

CARITAS UNIVERSITY| Enugu. Nigeria **Dec 2020**

B.Eng. Computer Engineering (Second Class Upper Division)

FINAL PROJECT: DESIGN AND IMPLEMENTATION OF A MULTI-PHASE SECURED WEB-BASED EXAMINATION
SYSTEM

AWARDS

- **Best Graduating Student**
- Best Programmer
